

Program Change for VSTi

In Reaper it is possible to achieve Program Changes by sending messages form a Midi Item. How to do it?

1. add a Track for the VSTi
2. add presets to the VSTi, counting from 000, 001, 002 and up
3. add a new Track and add a Midi Item.
4. choose Bank/Program Select in CC lane
5. add ReaControlMidi, set a Midi channel (all) and Enable and Load a ReaBank (PresetChanges.reabank).
6. add in the CC lane a few PC, like 0, 1, 2 etc.
7. drag I/O routing from PC Midi Track to the Track with the VSTi
8. push + of VSTi and set Link to MIDI program change to a midi channel that is appropriate
